Education

University of California San Diego

Sep 2021 – Jun 2025

- Bachelor of Science in Mathematics and Computer Science

Experience

Software Engineer Intern | Gary Technology (3 months)

Jan 2026 – Present

- **Led a team of 4** interns to ship **8** production features across a **React** and **Node.js** codebase, improving feature delivery speed by **20%**.
- Improved **API performance** by **25%** by refactoring backend code and optimizing **15+ PostgreSQL queries** in **Node.js** services.
- Reduced post-release bugs by **30%** by writing **40+ Jest unit tests** and implementing a **GitHub Actions CI pipeline** to block merges on test failures.

Web Developer Intern | Lex Consulting (6 months)

Jun 2025 – Dec 2025

- Delivered **10 client websites** with a **team of 5** interns for **8** local businesses and **2** churches, completing each project within **1–2 week** delivery windows.
- **Owned full-stack** delivery end-to-end for each client, building **responsive frontends**, writing **backend business logic**, and integrating **third-party APIs** per client requirements.

Software Developer Intern | Mex Tech (3 months)

Jun 2024 – Sep 2024

- Developed **6 full-stack features** for internal tools using **Angular** for frontend and **Java Spring Boot** for backend **REST APIs** under a software engineer mentor's guidance.
- Improved data access efficiency by **20%** by implementing **15+ MySQL queries** and integrating them with **Spring Boot** services.

Projects

Portfolio Website

- Built dynamic portfolio platform with automated content updates via **GitHub** and **LinkedIn APIs**, implementing efficient data fetching and caching strategies with modern **Next.js** architecture.

MarketSphere

- Built full-stack marketplace with **Stripe** payment integration, **Clerk** authentication, shopping cart functionality, and order management system.
- Designed responsive **UI** with streamlined checkout flow, product filtering, and inventory management using **Next.js** and **MongoDB**.

FinAI

- Built full-stack fintech application integrating **Plaid API** for multi-bank transaction aggregation with **NLP-based** categorization engine using **NLTK**, architected for scalability with **Docker** and **Vercel**.
- Implemented ML recommendation system using **scikit-learn** collaborative filtering algorithms with **JWT authentication**, role-based access control, and **AES-256** encryption for secure data handling.

StreamFlix

- Architected **Netflix-style** streaming application with **RESTful API** backend, lazy loading, and **CDN** integration, designed to handle concurrent connections with **Vercel's** serverless infrastructure.
- Developed collaborative filtering recommendation engine using **pandas** and **scikit-learn** with matrix factorization algorithms, containerized with **Docker** for deployment flexibility.

ChatPulse

- Developed bi-directional messaging platform using **WebSocket** protocol with optimized event handling, connection pooling, and **Redis** caching for low-latency message delivery.
- Engineered secure authentication system with **JWT** tokens, session management, and **MongoDB** persistence for chat history and user data.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, Golang, C#, HTML, CSS, SQL

Technologies: Spring Boot, .NET, React, Next.js, Angular, Node.js, MongoDB, MySQL, PostgreSQL, AWS, Docker, Git, GitHub, Jest, Vercel, Claude Code
